

## Codelco Recognizes Immersive Technologies for Outstanding Contribution to Training

17 December, 2012

Immersive Technologies was awarded for their "Outstanding Contribution to Training" at the Codelco 3rd Technical Standards Exhibition in Calama, Chile.

Business partners of Codelco were invited to attend the five day event which highlighted current technologies being used at Codelco mine sites and being integrated into their safety guidelines and standard operating procedures.

Immersive Technologies exhibited an underground truck module on their Advanced Equipment Simulator. This technology has helped leading mining companies around the world lower their cost per tonne in the safest possible way and transformed the way the mining industry recruits, trains, improves and assesses the risk associated with their equipment operators.

Manfredo Manfredi, Immersive Technologies Regional Vice President- Latin America, said "we are honored to be recognized by Codelco for our efforts in operator training. This award is particularly significant to Immersive Technologies, as Codelco is a long term user of our simulator products.

We offer the mining industry's only complete and scalable operator training solution and were delighted to showcase our latest offering to Coldeco Operators, Supervisors and Executives. We combine eLearning, instructor led training, medium and high fidelity simulators to provide the most cost effective training solution."

The Immersive Technologies Advanced Equipment Simulator was deemed one of the great attractions of the show and drew large crowds wanting to test drive the simulator and experience underground mining operations.

"As a company our goal is to make every mining and earth moving equipment operator in the world safer and their employer more profitable. This award from Codelco is testimony to our progress in achieving this objective," said Manfredi.

*Attendees of the Codelco Technical Standards Exhibition enjoy a demonstration of the PRO3 Advanced Equipment Simulator.*

### About Immersive Technologies

Immersive Technologies is the world's largest, proven and tested supplier of surface and underground Advanced Equipment Simulators to the global mining industry. The company has achieved this unique position by focusing on its mission to make every mining and earthmoving equipment operator in the world safer and their employer more profitable through its simulation technologies. Immersive Technologies' Advanced Equipment Simulators are helping hundreds of mining companies around the world to increase their equipment operators' safety and site profitability through effective simulation training.

Immersive Technologies provides its customers with the most effective Advanced Equipment Simulators available. This is made possible through the formal exclusive licensing and technical information alliances Immersive has established with the leading Original Equipment Manufacturers (OEM), including: Caterpillar, Hitachi, Komatsu, Liebherr and P&H Mining Equipment. These unique alliances provide Immersive Technologies with exclusive access to the OEM's proprietary and confidential machine technical information that is required to correctly simulate the OEM's machines and is not available through other public or dealer channels.

With advanced simulators modules deployed in 32 countries, Immersive Technologies is dedicated to provide outstanding service. To deliver on this commitment the company has customer sales and support offices located close to its customers in Perth and Brisbane Australia, Salt Lake City USA, Calgary and Ottawa Canada, Monterrey Mexico, Lima Peru, Santiago Chile, Bochum Germany, Johannesburg South Africa, Jakarta Indonesia and Kolkata India.

Immersive has the global mining experience, innovative technology, product range, OEM relationships, proven support commitment and industry vision to partner with you to ensure your simulator training solution delivers the significant results you expect.
